

## **Hearing Conservation II: Noise Assessment and Control**

### Description

This part II program will emphasize practical aspects in a workshop format with hands-on exercises. Participants will have the opportunity to use noise monitoring equipment and try many types of hearing protective devices. Modern equipment will be on hand to demonstrate the range of tools available for noise assessment and control.

Certification Maintenance points will be awarded for attendance. Application has been made for certification maintenance points from the BCRSP, CRBOH, ABIH.

### Topics Include

- Brief review of morning session
- Measuring Noise in the workplace
- Review of the requirements detailed in the CSA Standards related to noise assessment and hearing protection
- Noise assessment instruments and measuring procedures
- Controlling noise hazards
- Audiometric testing
- Question and answer session
